SOLUTION OVERVIEW

# TeamViewer Frontline Industrial Augmented Reality Solutions

Empower Your Frontline Workforce with Augmented Reality Workflows

## What is TeamViewer Frontline?

The TeamViewer Frontline solution includes Frontline Creator, Frontline Workplace, and Frontline Command Center.

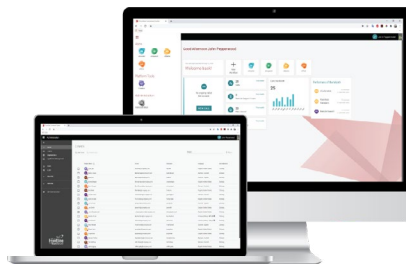

### Frontline Creator

An easy-to-use workflow designer, Frontline Creator enables you to set up and edit customized augmented reality workflows with drag-and-drop simplicity — no coding, programming, or development required.

### Frontline Workplace

With an adaptive user interface that changes according to the context or needs of the user, the Frontline Workplace app is hardware-agnostic and integrates with smart glasses and other wearables. By displaying workflow steps directly in the field of view of smart glasses, frontline workers can complete manual tasks efficiently, with both hands free.

### Frontline Command Center

A web-based centralized management hub, Frontline Command Center enables you to administer the modular Frontline solutions and manage your workforce by assigning tasks or providing help through remote support. Get total visibility into shop floor processes: analyze KPIs, see task overviews, review device statuses, and generate reports.

## Solution Highlights

### • Scalability

Quickly scale the solutions, transferring workflow requirements from site to site for uniformity.

### • Usability

Easy-to-use with a visual drag-and-drop user interface (UI) — no coding or programming required.

### • Adaptability

Send workflow task changes to your frontline workers' smart glasses and wearables in real time.

### • Agility

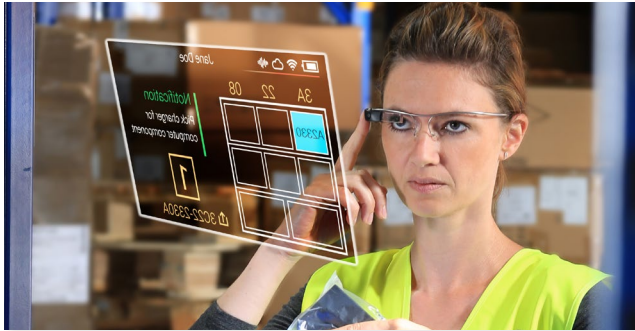

Quickly create and edit augmented reality workflows on-the-fly with a codeless visual workflow designer.

### • Flexibility

Deploy TeamViewer Frontline on-premises, in the Frontline Cloud, or in your private Cloud, according to your IT infrastructure requirements.

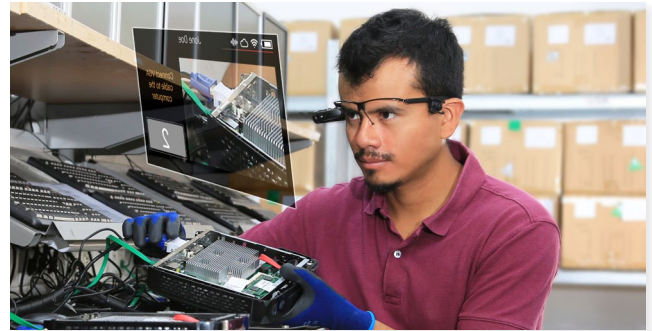

## TeamViewer Frontline Industrial Augmented Reality Solutions

Digitalize and streamline processes for your frontline workforce with augmented reality workflows – seamlessly integrated with wearables and mobile devices – increasing productivity, efficiency, and quality along the entire value chain.

### **xPick** Vision Picking

Digitalize logistics and warehousing processes by enabling frontline workers to follow graphic picking workflow steps through smart glasses and other wearables, improving accuracy and efficiency.

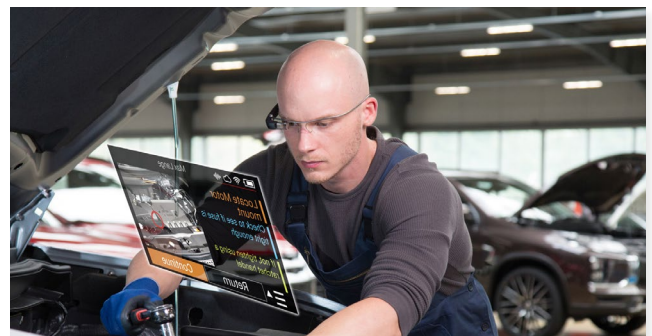

### **xMake** Make-by-Vision

Provide dynamically guided visual manufacturing and production workflows directly in the field of view of frontline workers' smart glasses to boost productivity and enable them to complete tasks with both hands free.

### **xAssist** See-What-I-See AR Remote Support

Enable your frontline workforce to connect to remote experts through their smart glasses for augmented reality support to assess problems and fix issues on devices, machines, and systems in real time.

### **xInspect** Inspect-by-Vision

Show your frontline workers step-by-step visual instructions, and enable them to automatically document and confirm every task digitally through their smart glasses for inspections, scheduled service, and predictive maintenance.

## Professional Services, at Your Service

### **Your success is our success.**

And that's why we offer comprehensive professional services to simplify and optimize your Frontline solution deployments, ensuring your success from day one.

From initial discovery consultations to define business and technical requirements, to collaborating with partner hardware vendors, we work closely with your team every step of the way to customize Frontline workflows, components, and features to meet your needs.

We'll help you select the optimal hardware and implement Frontline solutions in your manufacturing plant, factory shop floor, or warehouse. As always, stay connected with our help desk and technical support with individual service-level agreement plans, designed for your ongoing success.

## Customer Success

Over 250 customers around the world trust TeamViewer Frontline Industrial Augmented Reality Solutions.
